

WORK PROGRESS, FACILITIES, EQUIPMENT, AND CONTAINERS INSPECTION

Regular inspection of work progress, facilities, equipment, and containers is necessary to identify delays, address issues, anticipate potential risks, improve quality, comply with standards and regulations, and enhance efficiency and productivity.

Some examples of inspections include:

- *Hazardous conditions and behaviors.*
- *Safety and personal protection requirements.*
- *Environmental care.*
- *Security guard rounds.*
- *Closed-circuit television monitoring.*
- *Evaluation of fire extinguishers and hydrant gear.*
- *Evaluation of facilities and infrastructure.*
- *Supervision of cleanliness and maintenance.*
- *Construction progress monitoring.*
- *Verification of perimeters and access points (C-TPAT)*.*
- *Container review (C-TPAT)*.*

**C-TPAT stands for
Customs-Trade Partnership Against Terrorism*

Why is this important?

Some benefits of conducting these inspections are:

Identifying and correcting issues. Detect problems or areas for improvement in processes, infrastructure, equipment, safety, and hygiene, among other aspects. Preventive or corrective action promptly taken can avoid potential risks or damages.

Improve quality. Improve quality by implementing immediate corrective actions when job requirements don't accomplish.

Regulatory compliance. It ensures compliance with safety, occupational health, environmental standards, and other regulations established by government bodies.

Anticipating potential risks.

Allows for the timely identification of risk situations that

may lead to accidents, disasters, and other threats that could negatively affect employees and the organization's assets.

Increasing efficiency.

Helps identify opportunities for improvement in processes and procedures, which can lead to resource optimization, cost reduction, increased efficiency, and productivity.

All with the same tool

With **Metricos' Evaluation App**, you will be able to:

- *Create checklists and questionnaires.*
- *Schedule execution rounds.*
- *Identify locations, equipment, and containers with RFID.*
- *Assign work among supervisors.*
- *Send alerts in emergencies.*
- *Raise and submit Non-Conformities.*
- *Generate performance reports.*

Ensure that facilities, equipment, and containers are secure and that activities are carried out correctly.

Use conventional phones and tablets to inspect work progress, facilities, equipment, and containers.

Lead your organization to another level of performance with Métricos.
