

## VISITOR MANAGEMENT

A visitor registration system enhances security, access control, efficiency, and regulatory compliance.

### How do you manage your visitors? Are you still using pen and paper?

The traditional paper-based method is complex and time-consuming, and it does not provide reliable data such as visit frequency, visit duration, equipment brought and vehicles entered into the facilities.

A visitor management system simplifies this task and improves the efficiency of information management.

### Advantages of managing visitors with Metricos' Apps

#### **Agility.**

The person receiving visitors pre-registers them in the platform, specifies the date and time of arrival, and adds any additional observation when applicable. Upon completion, a QR code is sent to visitors by email for presentation upon arrival.

#### **Efficiency.**

Each visitor is registered just once by entering their full name, position, employment company, phone number, email address, the brand, model, and serial number of the computer or equipment brought in, and the license plate number of the vehicle driven. In future visits, applicable data is selected or added.

#### **Cost.**

Metricos' apps don't need sophisticated infrastructure, only a desktop computer, tablet, or phone connected to the internet. Metricos operates in the cloud without the use of paper. Upon arrival, the visitor's pre-registration form is retrieved by reading its printed QR code, missing data typed, ID image captured, and assigned badge read

it. Departure time is recorded with the returned badge when they leave.

#### **Convenience.**

Instead of searching through stacks of logbooks, with the visitor's name or their company name, their complete visit history and duration can be accessed within seconds.

#### **Security.**

The system will not allow incomplete records and can flag unwanted individuals to prevent future access.

#### **Normative compliance.**

Metricos visitor management app complies with several regulations, such as Customs-Trade Partnership Against Terrorism (C-TPAT).

#### **Image.**

Your visitors will be impressed with the efficiency and speed of their registration and will feel safer within your premises.

Use conventional computers, phones and tablets to manage visitors.

Lead your organization to another level of performance with Metricos' apps.
