

ONLINE TRAINING

E-learning or virtual training courses are programs conducted through digital platforms and delivered remotely via the Internet.

These courses utilize multimedia resources such as videos, interactive presentations, practical exercises, and online assessments to provide educational content and enable employees to acquire new knowledge and skills.

People acquire the required competence faster, at a lower cost, and without having to adapt to a specific schedule.

Some advantages of training staff with E-learning courses are:

1. Flexibility and convenience.

They offer flexibility in terms of time and location of study. Employees can access course content anytime, anywhere, using a personal computer, tablet, or phone with an internet connection, allowing them to tailor their learning to their schedules and pace. Organizations benefit when having geographically dispersed employees or variable work schedules.

2. Autonomy and self-regulation.

Allow employees to take control of their learning process. They can progress at their own pace, review content as needed, and choose resources that best suit their learning needs. It promotes greater engagement and motivation for learning.

3. Personalization of learning.

A tailored training program to each employee's needs. No need to form groups and coordinate dates for delivery. It ensures that employees receive relevant and specific training for their roles or work area.

4. Continuous updating.

In a constantly changing business environment, e-learning courses allow continuous updating of knowledge and skills, enabling employees to tackle current and future challenges.

5. Cost savings.

E-learning is more cost-effective than in-person training. It eliminates expenses associated with travel, accommodation, and rental of training rooms. Additionally, it allows for simultaneous training sessions of multiple employees on different themes and without physical space restrictions. It enables greater scalability and more efficient use of training resources.

A wide range of courses available to all collaborators

To develop their technical and soft skills.
